

Course: BSc(Hons) Applied Software Development (UI310)

Module: User Experience Design

This module aims to provide students with knowledge and skills around a variety of design methodologies, allowing them to break down a set of requirements and explore potential solutions. You will learn about the different functions of a business and how software usage can depend on the role and function of individuals. You will also be introduced to the format of development contracts and expectations around professional skills such as planning and achieving objectives.
