

UB211001: Non-Medical Prescribing

SCQF Level 11: 40 Credits

Module Length: 20 weeks

20 weeks

Semesters: Autumn and Spring

Learning Outcomes

LO1: Demonstrate a critical understanding of the principles of holistic patient assessment and apply this knowledge, to effectively exhibit safe, timely, effective and efficient prescribing practice across the life span

LO2: Critique and evaluate both non-pharmacological and pharmacological approaches to modifying disease and promoting wellbeing

LO3: Critically reflect on the influences of prescribing practice and decision-making principles and

apply this to the Royal Pharmaceutical Society's (2021) Competency Framework for all prescribers

LO4: Apply legislation and knowledge of medicines to one's own prescribing practice.

LO5: Critically appraise the leadership skills required for prescribing practice within the legal and professional frameworks

LO6: Provide a critical evaluation and synthesis of a range of prescribing theories, concepts and principles which align to the Royal Pharmaceutical Society's (2021) Competency Framework

LO7: To demonstrate and apply the Royal Pharmaceutical Society's (2021) Competency Framework to evidence eligibility for registration as an independent/supplementary prescriber on the relevant governing body register.

Mode of Study

Part-time (Structured): A blended approach will be adopted for teaching and learning using the university's virtual learning environment (VLE), along with eight live VC sessions for interactive learning on-line, adopting video conferencing technology to enhance learning experiences.

Study Sessions

Weeks 1, 3 and 5.

Assessment

Pharmacology exam in week 12

Numeracy exam in week 14

Portfolio of evidence in week 20
