

Module Code and Title: Advanced Nurse Practitioner/Professional Practice
UB711005: Expertise in Dementia Practice

Length of module

15 weeks

SCQF 11: Credits

20

Semester

Autumn

Learning outcomes

- Demonstrate confidence and competence to care for people living with dementia and their families along the full spectrum of their dementia journey, in a range of care environments.
- Explore, critique and appraise a range of national and global dementia care models.
- Acquire expert dementia knowledge and skills to lead expert dementia practice.
- Appreciate the relevance of national and global dementia strategies and policies to dementia practice.
- Develop inter-professional and collaborative skills to promote expert dementia practice regionally and nationally.

Mode of study

Part-time (Structured): A blended approach will be adopted for teaching and learning using the university's virtual learning environment (VLE), along with two face-to-face sessions for interactive learning either **on Highland campus** or via video conferencing.

Timing of face-to-face learning days

Day 1: Week 5/6 of the module

Day 2: Week 14/15 of the module

Assessment

Two assessments in the form of case studies/reflective accounts (2000 words each) will be required for submission in week 7 and week 13 of the module.
