

Module code and title: Advanced Nurse Practitioner/Advanced Professional Practice
--

UB711006: Improvement Science: Enhancing Quality in Health and Social Care
--

Length of module

15 weeks

SCQF 11: Credits

20

Semester

Spring

Learning outcomes

- Employ, evaluate and reflect upon the interaction between technical/rational aspects of change and the psychodynamics of change.
- Use measurement to understand and progress improvement work, with outcomes for patients and families as the key driver.
- Explore own management and leadership role as a facilitator of change which engages the whole team, especially patients and families.
- Apply improvement, reliability and safety theory to practice, and critique its effectiveness.
- Use at least three specific QI tools and critique their effectiveness.

Mode of study

Part-time. This module is studied through supported online learning via the university's virtual learning environment (VLE) with two optional face-to-face days.

Timing of face-to-face learning days

Day 1: Week 2 of the module

Day 2: Week 8 of the module

Assessment details

Assignment: 4000 word Quality Improvement Report in week 12
