

UB711006: Improvement Science: Enhancing Quality in Health and Social Care

SCQF Level 11: 20 Credits

Module Length: 15 weeks

Semester: Spring

Learning Outcomes

- LO1: Employ, evaluate and reflect upon the interaction between technical/ rational aspects of change and the psychodynamics of change.
- LO2: Use measurement to understand and progress improvement work, with outcomes for patients and families the key driver.
- LO3: Explore your own management and leadership role as a facilitator of change which engages the whole team, especially patients and families.
- LO4: Apply and critically evaluate improvement, reliability, and safety theory to practice.

Mode of Study

Part-time (structured): An online approach using the university virtual learning environment combined with four two study sessions via WebEx conferencing. One session is taught content and the other is a question-and-answer session.

Study Sessions

Week 3 and Week 5.

Assessment

A quality improvement report (4000 words).
